Code	Enhancement Name	Description
DO ALL ENHANCMENTS IN THIS GROUP		
E382136Z	Incorporating "wildlife friendly" fencing for connectivity of wildlife food resources.	Retrofitting or constructing fences that provide a means to control movement of animals, people, and vehicles, but minimizes wildlife movement impacts.
E338134Z	Strategically planned, patch burning for grazing distribution and wildlife habitat (undesirable plant pressure)	Patch burn grazing is the application of prescribed fires on portions of an identified grazing unit at different times of the year. Patch burn grazing allows grazing animals to select where they want to graze creating a mosaic of vegetation structures and diversity that will maintain or enhance the wildlife habitat desired for the identified wildlife species and maintain livestock production.

E528136Z2	Incorporating wildlife refuge areas in contingency plans for wildlife food	A prescribed grazing plan that includes 18 month (or longer) deferment of a pasture that consists of native grasses and/or legumes and/or perennial forbs for the purpose of meeting the needs for drought/disaster contingency plans that will also provide wildlife habitat for a period of time.
E528137Z1	Grazing management for improving quantity and quality of cover and shelter for wildlife	Grazing management employed will provide plant structure, density and diversity needed for the desired wildlife species of concern.
E528140Z2	Incorporating wildlife refuge areas in contingency plans for livestock feed and forage	A prescribed grazing plan that includes 18 month (or longer) deferment of a pasture that consists of native grasses and/or legumes and/or perennial forbs for the purpose of meeting the needs for drought/disaster contingency plans that will also provide wildlife habitat for a period of time.
