

Pack Barn Requirements for Dairy

2016 Environmental Quality Incentives Program (EQIP)

Eligibility: Dairy Feeding Operations

Purpose: To provide a facility as specified in publication "Compost Bedded Pack Dairy Barns", Manure Management Information Sheet, NRCS, 2007.

Requirements:

1. Only Dairy Feeding Operations are eligible for this practice.
2. 100 square feet of area per milk cow is used for sizing the facility.
3. The facility consists of a combination of a 313 scenario and one of the 367 scenarios.
4. Any other practices associated with this facility such as Waste Transfer will need to be evaluated by the NRCS engineer to determine the beneficial impact on the waste stream and volume.

Producer requirements for payment:

Install practice according NRCS plans and specifications. Payment is made following certification by appropriate NRCS staff with engineering job approval authority or acceptance by NRCS staff that system was installed as designed and certified by TSP and applicable NRCS standards and specifications.
