Steps to Assistance

How to Get Assistance from NRCS for Farms, Ranches and Forests

Get Started with NRCS

Do you farm or ranch and want to make improvements to the land that you own or lease?

Natural Resources Conservation Service offers technical and financial assistance to help farmers, ranchers and forest landowners.

1 Planning To get started with NRCS, we recommend you stop by your local NRCS field office.

We'll discuss your vision for your land.

NRCS provides landowners with free technical assistance, or advice, for their land. Common technical assistance includes: resource assessment, practice design and resource monitoring. Your conservation planner will help you determine if financial assistance is right for you. Please keep in mind that financial assistance is paid when work is complete.

2 Application We'll walk you through the application process. To get started on applying for financial assistance, we'll work with you:

- To fill out an AD 1026, which ensures a conservation plan is in place before lands with highly erodible soils are farmed. It also ensures no wetland areas are farmed.
- To meet other eligibility certifications.

Once complete, we'll work with you on the application, or CPA 1200.

Applications for most programs are accepted on a continuous basis, but they're considered for funding in different ranking periods. Be sure to ask your local NRCS district conservationist about the deadline for the ranking period to ensure you turn in your application in time.

3 Eligibility As part of the application process, we'll make sure you are eligible.

To do this, you'll need to bring:

- An official tax ID (Social Security number or an employer ID)
- A property deed or lease agreement to show you have control of the property; and
- A farm tract number.

If you don't have a farm tract number, you can get one from USDA's Farm Service Agency. Typically, the local FSA office is located in the same building as the local NRCS office. You only need a farm tract number if you're interested in financial assistance.

4 Ranking NRCS will take a look at the applications and rank them according to local resource concerns, the amount of conservation benefits the work will provide and the needs of applicants.

5 Implementing If you're selected, you can choose whether to sign the contract for the work to be done.

Once you sign the contract, you'll be provided standards and specifications for completing the practice or practices, and then you will have a specified amount of time to implement. Once the work is implemented and inspected, you'll be paid the rate of compensation for the work if it meets NRCS standards and specifications.

USDA is an equal opportunity provider and employer.

**Help for beginner, limited resource,
historically underserved, and veteran
farmers.**

The 2014 Farm Bill addresses the unique circumstances and concerns of farmers who are veterans, beginning farmers, have limited resources, or who have been underserved because they belong to racial or ethnic groups that have historically been subjected to prejudice. It provides for voluntary participation, offers incentives, and focuses on equity in accessing USDA programs and services.

- Programs may include a set-aside.
- Increased payments for costs associated with planning and implementing conservation measures may be available.
- Advance payments may be provided for purchasing materials or contracting.

**NRCS and conservation districts:
partners in conservation**

The USDA Natural Resources Conservation Service is a federal agency that helps people help the land through scientifically based, locally led voluntary conservation efforts.

NRCS works in partnership with New Hampshire's ten conservation districts, which help identify and address natural resource concerns in local communities, and coordinate public and private resources to meet local needs on a grassroots level.

A conservation district is a division of state government established under state law to conserve and wisely manage resources and partner with state and federal agencies to deliver programs, education and technical assistance to their communities. Visit www.nhacd.org to locate your conservation district and to learn more.

USDA is an equal opportunity employer, provider, and lender.
